

CAMILLA FOWLER

Head of Risk Management
TRL Risk Team

Camilla Fowler is Head of Risk Management at TRL. She is currently leading the development and review of safety cases for a number of automated vehicle trials in the UK, including the UK's first real-world HGV platooning trial.

Camilla is the technical author of BS PAS 1881, which sets out the safety case requirements for automated vehicle trials and testing and has recently authored Zenic's safety case framework and guidance for CAM TestbedUK.

Camilla has over 20 years' experience in risk assessment, risk management and the development and implementation of control strategies and cost-effective solutions. She has a full understanding of safety management systems and has worked as an expert witness in this field.
